

MG20

1. Designed for pumping industrial and agricultural chemicals.
2. The MG20 features EPDM seals, a type of rubber material that is designed to be compatible with a wide range of chemicals.
3. The engine is easy starting and provides ample power for the toughest conditions.
4. The MG20's reinforced thermoplastic housing, volute & impeller improve chemical resistance.
5. The frame protects the pump, while offering a convenient tie down location for transport.
6. Protects the pump by shutting the engine off when low oil is detected.
